MADEIRO PRO

PROGRAM: PRO compact wave

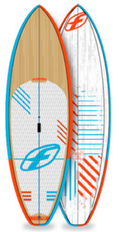

- NEW SPECIFIC CARBON CONSTRUCTION: for 2015, the MADEIROS PRO benefit from a new specific carbon construction. On deck the MADEIROS PRO are made of a bamboo / carbon sandwich where the bamboo is laid over a layer of carbon fiber, while the bottom receives a high density foam / carbon sandwich construction (Fiberglass + High Density Foam + Carbon / Fiberglass) with brushed finish. This construction brings high resistance and a significantly lower weight to the MADEIROS PRO which have improved their strength / weight ratio and remain amongst the lightest and most high performance boards on the market.
- NEW SHAPE FOR 7'5" & 7'7": new rocker line with more lift on the nose & new volume for a better balance.
- NEW SIZE FOR 8'5" & 8'8".
